Research Interests

Clouds are fundamental to Earth's climate system, shaping both the hydrological cycle through precipitation and the global energy balance through their reflective (cooling) and heat-trapping (warming) properties. The processes governing cloud behavior span an extraordinary range of scales—from microscopic droplet formation to the evolution of weather systems hundreds of kilometers across—making clouds one of the least constrained components in predicting weather and climate.

I am particularly interested in characterizing and quantifying how clouds respond to changes in their environment, including variations in aerosol loading and meteorological conditions arising from human activities and natural climate variability. These questions, multiscale by nature, continue to confound our understanding of the changing climate and obscure robust projections of our planet's future. To address these challenges, I leverage data-driven methods that integrate satellite observations, atmospheric modeling, and field measurements to extract physical understanding of the processes governing clouds.

Professional Appointment

- | | |
|------------------------|---|
| May 2023 – present |  Research Scientist II , NOAA Chemical Sciences Laboratory & CIRES at the University of Colorado Boulder |
| Sept. 2021 – Apr. 2023 |  Research Scientist I , NOAA Chemical Sciences Laboratory & CIRES at the University of Colorado Boulder |
| Sept. 2020 – Aug. 2021 |  NRC Postdoc fellowship hosted by Graham Feingold at NOAA Chemical Sciences Laboratory |

Education

- | | |
|------|--|
| 2020 |  Ph.D., University of Miami, Miami, FL, USA in Meteorology & Physical Oceanography.
Dissertation title: <i>The interactions between light-absorbing smoke and marine boundary layer clouds over the remote southeast Atlantic.</i>
Committee: Paquita Zuidema (Chair), Brian Mapes, Brian Soden, Cassandra Gaston, David Turner & Takanobu Yamaguchi |
| 2014 |  B.S., Florida State University, Tallahassee, FL, USA in Meteorology.
<i>Magna cum laude; Minor in Mathematics.</i> |

Funded Grants

- | | |
|--------------|--|
| 2025-2026 |  P. I.: A Framework for Assessing SRM Detectability for Informed Decision-Making (Reflective, \$162,768) |
| 2023-2026 |  Co-I.: Aerosol-Cloud Interactions Centered on MAGIC: Insights from Measurements and Lagrangian Large Eddy Simulation (DOE Atmospheric System Research, \$670,445) |
| 2023-2024 |  Co-P.I.: Exploring Aerosol-Cloud Interactions in Geophysical Variable Spaces using NASA-ACTIVATE Observations (NASA Earth Venture Suborbital-3, \$350,000) |
| 2020-2023 |  Co-I.: Evaluating Biases in Aerosol-Cloud Interaction Metrics using ARM Data and Models (DOE Atmospheric System Research, \$510,472) |
| 2020-2021 |  P. I.: National Research Council Fellowship Award (National Academies of Sciences, Engineering, Medicine, \$62,000) |
| 2020-ongoing |  NOAA Earth's Radiation Budget Program (internally funded) |

Awards, Fellowships, & Honors

- **NOAA Boulder Outreach Gold Star Award, 2025**
- **Reflective Fellowship, 2025**, Reflective Inc.
- **National Research Council Research Associateship Fellowship, 2020**, National Academies of Sciences, Engineering, and Medicine
- **NASA's Group Achievement Awards** (ACTIVATE Team, 2023; ORACLES Team, 2019)
- **Finalist of University of Miami Best Ph.D. Dissertation, 2020**
- **University of Miami Graduate Fellowship, 2014** (highest award of the graduate school)

- May 2023** ■ **ACPC Workshop 2023, Houston & online, TX, USA**, *Time-dependent cloud adjustments to aerosol in non-precipitating stratocumulus: diurnal cycle and MCB implications.*
- Dec. 2022** ■ **2022 AGU Fall Meeting, Chicago, IL, USA**, *On the Conditionality of Marine Low Cloud Albedo Susceptibility: from Meteorological Conditions to Spatiotemporal Scales.* ([invited](#))
- Aug. 2022** ■ **AMS's 16th Conference on Cloud Physics, Madison, WI, USA**, *Distinct regional fingerprints of marine low cloud albedo susceptibility.*
- May 2022** ■ **ACPC Workshop 2022, Online**, *Distinct regional meteorological influences on low cloud albedo susceptibility over global marine stratocumulus regions.*
- Jan. 2022** ■ **2022 AMS Annual Meeting, New Orleans & online, LA, USA**
1. *Albedo susceptibility of marine stratocumulus: The role of covarying meteorological conditions & its geographical distribution.*
2. *Amplified seasonal cycle in southeastern Atlantic low cloud fraction when biomass burning smoke is present.*

Teaching, Mentoring, & Outreach

- Teaching** ■ **Aerosol-Cloud-Climate Interactions** as *Guest lecturer*, TU Delft (June 2024)
Introduction to Weather and Climate as *Teaching Assistant*, University of Miami (2015)
AP calculus and undergrad statistics as *Math Tutor*, Miami (2015-2020)
- Mentoring** ■ **Tyler Tatro**, Ph.D. student at University of Miami (2022-present)
Alexander J. Thompson, Research Scientist at NOAA/PSL (2024-2025)
Danyan Leng, Ph.D. student at University of Colorado Boulder (2025-present)
Daisy Kerr, NOAA Hollings Scholar, Physics undergrad at UC Berkeley (incoming 2026)
- Outreach** ■ **CIRES Science Pathways Program**, CIRES speaker (2025-)
Scientist Panel, Environmental studies class at Boulder High School (2025)
Panelist, CIRES Graduate Student Workshop (2025)
Invited Scientist, Boulder Valley Rotary Club Weekly Discussion (2025)
Evaluator, Research Experience for Community College Students Symposium 2024; GLOBE International Virtual Science Symposium 2022; Climate Literacy and Energy Awareness Network 2022, AGU Outstanding Student Presentation Award 2020
Science vetting, Children's book *UP, UP HIGH*
